The Galaxy Note 3 was presented on September 4, 2013, with its release all over the world starting during the month. It serves as a successor note Galaxy II, note 3 has been designed to have a lighter design high demand previous galaxy series iterations (with a plastic leather support and fake metallic bezel), and to extend the stylus and multitasking oriented functionality in its software € which includes a new navigation wheel for enabled pen applications, along with pop-up applications and multi-expanded wheel-window features. [3] Samsung sold 5 million Galaxy Note 3 units in its first month of sale [4] and 10 million sales units broke in just 2 months. [5] Specifications White Design Hardware Samsung Galaxy Note 3 One back side and stylus The Galaxy Note 3 design was meant to bring more sophisticated, "premium" look compared to previous Samsung devices. [6] Although it brings a similar polycarbonate design oriented to other recent Samsung devices, the Galaxy 3 note has a fake metal ring and a back cover in plastic leather with fake stitching. With a thickness of 8.3â mm (0.33â, a), it is slightly more subtle than the Galaxy Note II, and is slightly clearer. The diffuser is placed in the lower part instead of the back, [7] while it is positioned on the rear side on note 1, 2 and 4., compared to the back side speaker of note 1, Note 2 and 4. The Galaxy Note note 3 was made available in black, white and pink. In December 2013, He introduced three new color combinations to select the markets; Black with gold-colored finishes, white with rose gold and red finishes with silver-colored finishes. [8] Display The display of the Galaxy Note 3 is 5.7-inch Super AMOLED 1080P display, which is 0.2 inches larger than the 5.5-inch display of the Galaxy Note 2, and a resolution updated by the 720p view note. [3] [9] [10] [11] Storage The device includes 3â, GB of RAM for the first time in a mobile phone, and 16 GB internal storage options, 32 GB and 64 GB. [3] [9] [10] [11] The Galaxy 3 note is also the first smartphone to include support for USB 3.0, which allows faster and top-up data transfers when connected to a compatible port. [12] Battery The size of the Galaxy Note 3 battery is 3200 mAh, which is 200 mah higher than its predecessor. [3] [9] [10] [11] On the UNPACKED Keynote of the Galaxy Note 3, Samsung has supported significant improvements compared to the Galaxy 2 of the battery life due to greater efficiency, such as the four hours of additional video playback. [13] Chipset and connectivity The LTE version sold in America European Union and North the Galaxy Note 3 (N9005) uses a 2.3A GHz Quad-Core Snapdragon 800 chip, while the GSM-single model (N9000 / N9006) sold out First use regions an octa-core exynos 5420, consisting of four 1.9th GHz Cortex-A15 core and four core 1.3A GHz Cortex-A7. Tests demonstrated similar performance for both models. [14] Galaxy Note 3 Duos (N9002) is based on the LTE variant but adds a second slot for additional SIM cards. Galaxy Note 3 sensors are equipped with common sensors (accelerometer, gyroscope, digital compass, frontal proximity sensor and a barometer sensor). Furthermore, it has a sensor for air gestures (quick look, air jump, browse AIR and AIR to the call accept [15]) and a hall sensor to detect the closure of the s-view accessory covers. Like the only tip of Samsung mobile phone next to the Galaxy S4, it is equipped with a sensor thermometer and hygrometer, mainly used the Samsung s health and some third-party weather station software. [16] [17] [11] To detect the floating finger for viewing air view, [11] The Galaxy 3 note is equipped with an additional self-capacitive touch screen layer [18]. The Galaxy Note 3 camera is equipped with a 13-megapixel (4128Âf5 3096) revolt camera capable of video footage movie in 4K resolution (2160p) at 30 frames per second (limited to 5 minutes per video) and in 1080p at 60 frames per second. Note - only the Snapdragon variant of the galaxy note 3 can record in 4K. The Exynos variant will only be 1080p record video. [3] [9] [10] [11] Slow Motion Video Films are recorded at 720p to 120 frames per second, but without audio track. [11] As the Galaxy S4, released a year and a half before, the rear camera of note 3 Use the Sony Exmor RS IMX135 image sensor. The camera software and the user interface is very similar to that of the S4 as well. [19] However, note 3 is the first Samsung mobile phone and one of the first mobile phones to support 2160p video recording, 1080p at 60 frames per second (compared to 30 fps) and 720p at 120 frames per second. [11] The front camera has an opening of f / 2.4 and uses the same image sensor like the Galaxy S4, a Samsung CMOS S5K6B2, and similarly captures photos and 1080p (2.1 megapixel) videos; The second at 30 frames per second. [20] S-Pen This section must expand. You can contribute by adding to it. (July 2020) As with other known GALAXY series devices, the Galaxy 3 Navi note with a stylus Pen S, which has been updated to use a more symmetrical form. [3] [9] [10] As the previous one, the Wacom digitizer is able to distinguish between 1024 levels of pressure sensitivity. [21] [22] Removing the stylus from its housing or pressing the button while you live above the display activates the new "Air Command" menu, which provides connections Pen-oriented functions as a memo action (on the screen sticking notes that recognition use of writing to detect their content and provide relevant actions, such as looking at the addresses on Google Maps and dialing phone numbers), write screen (one annotation tool), window window pen Allows users to draw Windows pop-up to run certain apps within), the finder search tool and scrapbook (which allows you to store and categorize the image and text extracts from various apps). [23] The multi-window functionality has also been updated with the expanded app support, the possibility of performing more instances of a single app and the possibility of dragging and releasing content between the apps. The device is also supplied with a news aggregator app known as my magazine, accessible by analyzing from the bottom of the screen and an updated version of the S. [11] [3] [24] The Galaxy Note 3 is the first phone Mobile phone with the possibility of opening a supported interval of applications in floating pop-up windows. [25] By default, however, the function is accessible only by using the so-called AIR command menu open using the button on the stylus. [26] [27] The stylus allows you to access Samsung Air View, which shows a preview of content when you are hovered above, including albums in Samsung's precluded gallery software, SMS messages, contact information of Quick selection, text boxes like the browser URL bar and a preview bubble from the Samsung video player search bar (as also known by YouTube and Dailymotion desktop sites). [26] The pen s can also be used to scroll through the upper or bottom edge of the screen, and blending over the folders on the main screen expands the icons. [28] The Galaxy Note 3 is the only mobile phone in the Samsung Galaxy Note series to support the air view with the stylus and flaring fingers. [26] [29] [30] S-view cover The S-View Cover accessory is a horizontal flip case with a preview window through which the Android status bar (with signaling and signal indicators and icons of Notification), a watch and the number of unread messages can be seen. There are also interfaces to answer incoming and snooze calls or interrupt a ring alarm, music reproduction controls, title and name of the artist, album cover and playlist browser; The possibility of creating Memo Actions (Digital Post-it Notes), weather, healthy health health (if activated) and a basic camera camera interface [A] with the possibility of browsing recent photos. The size of the preview window has doubled compared to it on the Galaxy S4, the first Samsung device is equipped with this accessory. Features listed above since music playback controls have been added. The accessory is attached by replacing the default back cover instead of covering it and is detected through the pins on its inner side instead of a room sensor used on the Galaxy S4. [31] [32] Software The Galaxy Note 3 control menu, with 23 acts of quick floors. The "Download Booster" function has been added with the Android 4.4.2 update. General The Galaxy Note 3 is equipped with Android 4.3 "Jelly Bean" and Touchwiz Natmix 2.5 Samsung Touchwiz 7.5 user interface. Further pen-oriented features have been added to note software 3. The Galaxy Note 3 has inherited the interaction functional of the Galaxy S4, such as Air View, Gestures Air, Samsung SmartScreen and movement gestures on screen. [33] The Samsung Group's game software introduced on the Galaxy S4 was extended by the possibility of playing videos through up to four Galaxy Note 3 units that form a larger screen surface together. [34] Due to the size of the device's large device device, a new feature has been added that allows you to simulate a smaller screen size for one-handed operation. [35] [36] A FTP client function was The Precluding "My Files" file manager and a search function has been added to the system settings. [37] [38] Android 4.4.2 Update Kitkat On January 13, 2014, an update to Android 4.4.2 "KITKAT" was made for the first time via Samsung Kies in Poland for LTE models. [39] The update adds user interface changes as a shortcut from the camera to the angle of the lock screen, options for setting default startup applications and text messaging applications, support for printing and a new Position settings menu for EE monitoring Use of position monitoring per app. [40] [41] [42] 4.4 also provides significant changes to the management of secondary storage on the device for safety reasons; Application access to the SD card is now limited to the designated directories, only specific apps, while it is still possible to access full access to the primary internal memory. Although this behavior existed by Default since Android 3.0 "a honeycomb", OEMs as Samsung previously modified their Android distributions to keep the previous behavior, allowing applications to have unlimited access to the contents of the SD card. [43] The updated functionality inherited from the Galaxy S5, including spherical panorama and virtual tour in the camera software, booster downloads and Samsung children's modalities. [44] Android 5.0 Lollipop Update Samsung started rolling an update to Android 5.0 "Lollipop" in January 2015. [45] The changes visibly influenced the user interface, replacement of the Touchwiz Nature UX 2.5 with 4.0. Release Samsung first teasing the presentation of the galaxy note 3 with his announcement of a rich event of Samsung Heavy on September 4, 2013 at IFA Berlin, which contained the "note the date" tag. [46] The International Galaxy Note 3 was released September 25th 2013 in over 140 countries, while its US and Japanese releases were released in October 2013. [11] All the Galaxy Note 3S will also include a subscription of a Free year at Evernote Premium. [1] [13] [10] The American, European and Indian models of the Galaxy Note 3 implement a regional blocking system in certain regions; Requesting that the SIM card used on a European and North American model both by a courier in that region. While a Samsung spokesperson claimed that the lock would have been removed once a valid SIM card was used, it was reported by users that this was not the case. Although a user of developers XDA has developed a tool to delete the black cart of the trolley that uses the system, requires the phone to be rooted. A spokesperson claimed that the system was mainly intended to prevent the gray market claim, although some critics suspected that the carriers may have asked Samsung to implement the function to force users to wander during the journey by preventing them from using a SIM card local. Samsung has also claimed to have implemented a similar policy on the Galaxy S III, Note II, S4 and S4 Mini models manufactured after July 2013. [47] [48] Note 3 models are: SM-N900 (GSM), N9000 (3G), SM-N9005 (4G / LTE), N9002 (LTE Dual-SIM), SM-N9006 (China / WCDMA), SM-N900A (United States AT & T), SM-N900T (USA T-Mobile), SM-N900P (USA Sprint), SM-N900V (USA Verizon), SM-N900R4 (USA Cellular), SM-N900W8 (Canada and some of Latin America operators) Reception Green has complimented incremental improvements for hardware And the Galaxy Note 3 software, considering it as the "best attempt still making the optional input touch on a mobile device". Its overall design was considered "cohesive and well thought out" despite the continuous use of Samsung plastic, and subtle changes as a symmetrical stylus was also noticed. However, the My Magazine app was addressed to be an "attached". [3] TechRadar considered the galaxy note 3 to be an evolution compared to its predecessor (including its fastest hardware and a larger screen), but has criticized the device design to not look like "slick and premium" in the Real life as he did during the promotional video. [49] Some 3S Note have had quality control problems. After using it for a short period of time, some users have discovered that the Home button on the phone was Á e á, - And began to change ". Some images loaded by interested users show that the Home button will move, down, left or right when you press when you press the Home button on your note 3 after only 3 hours of use. In A survey conducted by the Android police, there were 2017 note 3 users who complain that their home button was concerned, but only 1150 users did not encounter this problem. [50] See also comparison of smartphones notes ^ The camera of the S view cover It is limited to 3096-3096, the highest quadratic image sensor harvest rather than full 4128-3096. Photos are saved in a separate directory: DCIM / Covercamera.
